Department Description

The Security Management team are responsible to protect Atradius, Information and data from cyber threats. The Engineer will report to the Head of Security, who is responsible for defining the Information Security strategy, policies, standards, processes and procedures and technology, monitoring compliance with security requirements and addressing any security issues.

In this position your key responsibilities will be:

- Maintainance and support of security measures for Atradius' systems, ensuring that they meet not only the business needs, but also legal, regulatory and compliance requirements and that these are suitably audited.
- Providing technical security support to projects and other requests from the business, to provide practical, realistic advice as to how to meet business needs, whilst reducing the level of risk to the business and processes.
- Enhance identity and access management , threat intelligence, security logging, monitoring and alerting through optimisation automation into Atradius security platforms to improve threat hunting, incident analysis and response capbilities.
- Automate, improve and add contextualisation to Atradius vulnerability management tooling and processes.
- Ensure correct secure configuration management on Atradius supporting platforms and cloud hosting services.
- Support Atradius Microsoft E5 investment and Microsoft Azure security.
- Support Network Security especially around network segmentation, certificate management and DNS security.

What qualification should you have? The ideal candidate will have a minimum of two years experience in a similar role and meet the following profile:

Required qualifications:

- Relevant, Information Security and Information Technology knowledge. Applicants able to demonstrate this experience and knowledge, but lacking the relevant certifications will be considered (CIGE, CIST, CIAM, CIMP, CAMS, CAP, CISSP, etc.)
- Microsoft Certifications focussed on security (e.g. Microsoft Certified: Security Operations Analyst Associate, Microsoft Certified: Identity and Access Administrator Associate). And /or Cisco Certifications (or similar) (e.g CCNA, Cyber Ops or CCNP Security)
- Technical knowledge in one or more of the following – Unix, AIX, Linux, Windows, Oracle, F5, WAF Cisco, Palo Alto, Azure, AWS, Google.
- Experience of one or more in Defender, Nessus, ELK, Burp suite, Imperva, Zscaler or other security compliance tooling and their enterprise implementation highly desirable.
- Experience of supporting an Identity and Access Management suites and their

enterprise implementation, including API security, RBAC, ABAC desirable.
•Some experience in secure coding / scripting, examples include (HTML, Bash, Python, Java, Ruby, Powershell, PHP) would assist.

Other qualifications:

•Experience with security standards (e.g. ISO27001/2, NIST, CIS), security best practices and major cyber security / privacy related regulations.
•Demonstrable experience of having worked within Information Security as an analyst or engineer is highly desirable.

What do we offer?

•A dynamic, international and challenging work environment
•Training and support to reach your full potential including the opportunity for continuous professional development
•Attractive terms and conditions, including competitive salary, pension package and a range of flexible benefits and rewards
•Challenging tasks with individual development and training opportunities

Equal opportunities for all

The success of our organisation stands with the quality of our people and the ideas they have. Insights and innovative solutions for our customers are the result of an interplay of cultures, knowledge and experience. That is why diversity is extremely important to Atradius. To ensure that all colleagues within Atradius can develop their qualities, we promote an inclusive culture in which everyone feels involved and valued. We encourage and welcome everyone to apply to our positions.
